

DICHTEX

GASKET REMOVER

PRODUCT DESCRIPTION:

Removes sealants in a matter of minutes. Additional additives enable long-lasting penetration of the solvent, meaning that even dried layers of adhesive can be released from the subsurface.

APPLICATION AREA:

The addition of flow control agents also guarantees use on vertical surfaces, with added corrosion inhibitors protecting the surfaces of bare metal parts. Suitable for varnish removal from smaller components

Cannot be used with sensitive plastics, PVC, synthetics and linoleum.

Important: After use, point spray head downwards and spray until the valve is empty!

BENEFITS:

- protects metal surfaces
- reliably removes sealants, oil carbon residues, paint, grease and oil
