

UMLAUFREINIGER INDUSTRY

for Kleinteilereiniger

PRODUCT DESCRIPTION:

The Umlaufreiniger is solvent-based and particularly suitable for use with our mobile small parts cleaner (Mini-Clean). With its cleaning power, it largely replaces highly flammable products such as petrol, acetone and nitro.

APPLICATION AREA:

Ensures residue-free removal of oils, grease, tar, bitumen and all soiling usually found on machines and their parts. Application options are almost unlimited as the circulation cleaner can be used to clean all metals, plastics and rubber.

BENEFITS:

- anti-corrosive
- odourless
- good grease absorption
- Flash point above 60°C
